ORCHID PRINT COLLECTION

Rivermont's orchid prints have become famous throughout the world. We are offering a set of seven for \$2.00, postpaid. These exquisite reproductions from Kodachromes and paintings are approximately 8-3/4" x 11-1/4". Units cannot be broken and when supply is exhausted, it is unlikely these will be reprinted.

Laeliocattleya Snowdrift, var. Rivermont
Cattleya Bow Bells, var. Emily
Laeliocattleya Derna, var. Jean
Laeliocattleya Clint McDade
Cattleya Stalin, var. Rivermont, AM, RHS
Laeliocattleya Gold Gleam, var. Martie Everest

The seventh print bears pictures of the five following blooms. Each picture is approximately 3" x 3-1/4" in size.

Laeliocattleya Hyperion, var. Rivermont
Cattleya Thetis, var. Rivermont
Cattleya Swan, var. Snow Queen
Laeliocattleya Windermere, var. Clovelly, AM, RHS
Laeliocattleya Princess Ishtar, var. Mary, AM, RHS

FERTILIZERS

Rivermont recommends fertilizing seedlings and mature plants of Cattleyas, Cypripediums, and Cymbidiums; however, we should like to caution that if the plant does not have a well developed root system, do not fertilize under any circumstances, because the plant will not absorb the nutrients which are made available in the potting medium.

These are the two fertilizers we use and recommend:

VHPF (Guaranteed analysis 6% nitrogen,
25% phosphorous, 15% potash)

NUTRI-LEAF (Guaranteed analysis 16% nitrogen,
16% phosphorous, 16% potash)

Both of these superior plant foods contain trace elements and growth stimulation hormones. VHPF is used as a fertilizer, and NUTRI-LEAF is used as a liquid fertilizer and as a spray for the leaves. The recommended concentration of each is as follows:

When fertilizing weekly, use 1/2 tablespoon per gallon water. When fertilizing at two week intervals, use 1 tablespoon per gallon of water.

VHPF - 3 lb. package - \$1.50

NUTRI-LEAF - 3 lb. package - \$1.60

Please ship _____ 3 lb. packages of VHPF @ \$1.50

Please ship _____ 3 lb. packages of NUTRI-LEAF @ \$1.60
